CASE STUDY

## Homewood Suites Lighting Project

### Project Description

The Homewood Suites by Hilton Seattle Downtown hotel in Washington's central location, is near the heart of downtown Seattle, making it ideal for both short term and extended stay guests.

Homewood Suites reached out to GreenLight to assist with the modernization of their parking garage lighting. Unbeknownst to them, Seattle City Light was offering funding for precisely this type of project. As a result, not only did we design and provide the lighting systems, we secured the available funding for them as well. Experiencing the success of the parking garage project, Homewood Suites realized the opportunity to upgrade their interior lighting systems as well, and engaged us to upgrade the entire property to energy saving LED lighting.

*"It's been nothing but an absolute pleasure to work with you guys and I give my highest recommendation to anyone else considering using Green Light Energy Conservation when upgrading their property to LED lighting."*

-Scott Snofsky  
GM
