

Resort Campus Water Project
DoubleTree by Hilton Orlando at Seaworld
 10100 International Drive
 Orlando, FL 32821

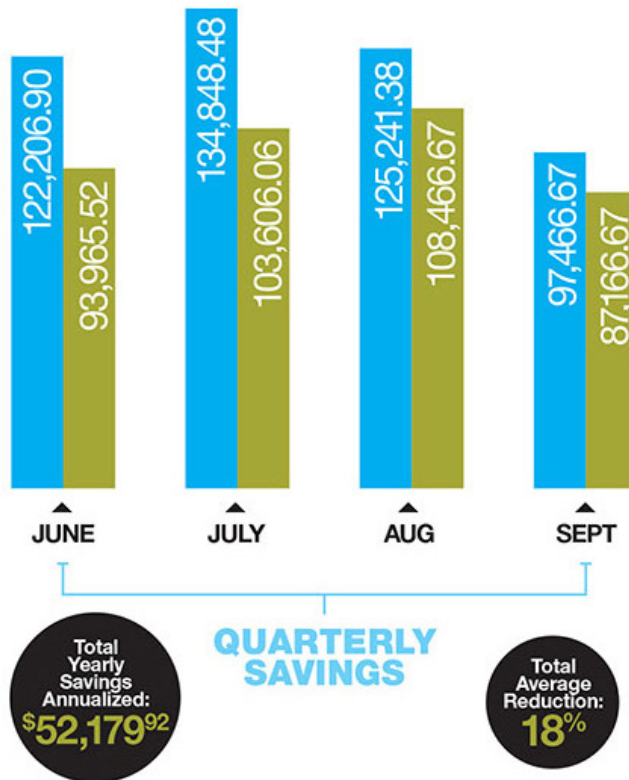

Project Description

DoubleTree by Hilton Orlando at Seaworld is an 1100-room resort set upon a 28-acre property.

In 2014, GreenLight successfully implemented a comprehensive resort-wide water conservation installation, that has resulted in an average of 18% water reduction year-over-year. The extensive implementation was executed without any interference with the resort's daily operations.

REDUCTION 2013-2014 ■ GPD 2013 ■ GPD 2014

Our energy efficiency work with Green Light has resulted in an important re-investment in our facility, with substantial operational and maintenance improvements. The changes were implemented in a cost-effective manner, without disruption to our normal operations. This project has benefits that are beyond financial, as these improvements are beneficial to our environment.
