

Multifamily Water Project

Carlton Apartments

120 W Farrell Avenue
Ewing Twp, NJ 08618

Project Description

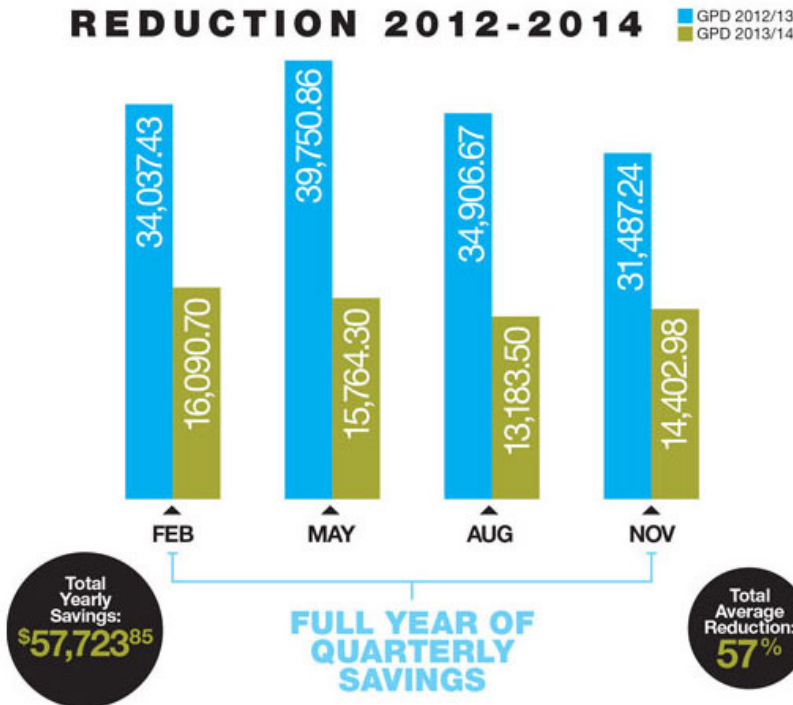

The Carlton Apartments is a suburban 288-unit garden style apartment complex, comprised of 18 buildings.

GreenLight successfully implemented a comprehensive complex-wide water conservation installation. The project has resulted in a 57% water reduction year-over-year.

The extensive implementation was executed with great sensitivity to the privacy and needs of the tenants.

REDUCTION 2012-2014

These reductions far surpassed our expectations, and were consistent with the assumptions in your initial feasibility study.
– Michael Zucker
 Regional Property Manager

Results:
